Team - see note from Richard. He needs more safety specific info and he needs it asap. We need your assistance pulling together the materials he has outlined below.

Please confirm receipt of this message and forward materials to Christina and me asap.

Meko – you can help w/the safety ?s and Jag can you provide inof on the summer derailment?

Subject: Re: For Review: Briefing Packet and SEA

Good briefing document, but needs to be stronger and more specific about the reform of the safety processes at Amtrak. As an example, the Train 89 NTSB report recommended the implementation of an SMS system. We are undertaking that effort now. So the specifics like Safety Starts with Me are important facts. We must have specific background information on the remediation plans we are implementing after the several accidents and incidents.

Please track down the information on the over speed derailment Amtrak had in early July of 2017 on the Cascade. What happened? What did we do to correct the problem?
